Cricket Player Performance Tracking Application: CRICKSTATS

1. INTRODUCTION

1.1 Project Overview :

CRICKSTATS is a cloud-based cricket performance tracking system developed using Salesforce Lightning Platform. The application is designed to record, manage, and analyze cricket players' match-by-match performance data. It uses custom objects, relationships, roll-up summaries, flows, reports, and dashboards to generate structured performance insights. The system helps coaches, analysts, and team managers to monitor player statistics efficiently and support strategic decision-making.

1.2 Purpose :

The main objectives of CRICKSTATS are:

- To digitize player performance records
- To eliminate manual record maintenance
- To improve data accuracy
- To provide real-time analytics
- To automate performance calculation
- To support better team selection decisions

2. IDEATION PHASE

2.1 Problem Statement

Traditional cricket data management faces the following issues:

- Player data stored in multiple files
- Manual calculation errors
- Difficulty in comparing player performance
- No centralized analytics system

These problems create confusion for coaches and managers during team selection. **2.2 Empathy Map Canvas**

Target Users:

- Coaches
- Team Managers
- Sports Analysts
- Salesforce Admin

User Needs:

- Accurate statistics
- Easy data entry
- Fast report generation
- Automated calculations

2.3 Brainstorming

Different solutions were analyzed:

- Web-based system
- Mobile statistics tracker
- AI-based analytics
- CRM-based solution

Final Selected Solution:

Salesforce-based performance tracking system (CRICKSTATS)

3.REQUIREMENT ANALYSIS PHASE

3.1 FUNCTIONAL REQUIREMENTS:

FR No	Requirement
FR-1	Player Registration
FR-2	Match Performance Entry

FR-3	Roll-up Summary Calculation
FR-4	Dashboard Generation
FR-5	Flow Automation

3.2 Non-Functional Requirements

Usability

- Simple Lightning interface
- Easy navigation
- User-friendly dashboards

Security

- Role-based access control
- Secure login
- Data privacy

Reliability

- No data loss
- Automatic updates
- Stable performance

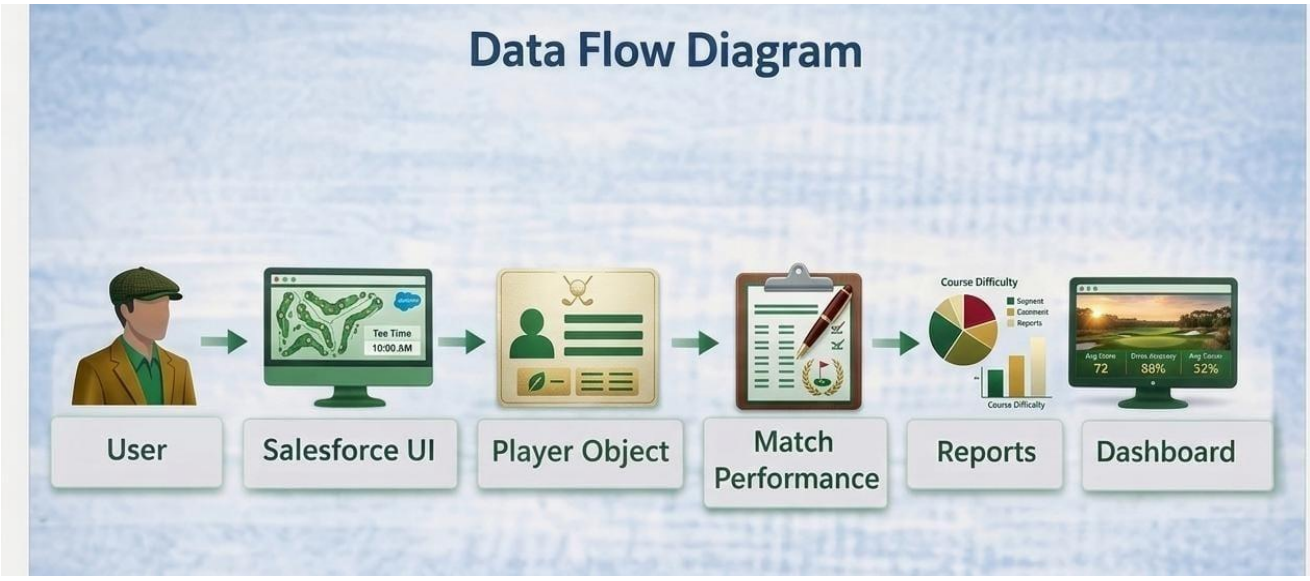
Performance

- Fast report generation
- Quick dashboard loading **Availability**
- 24/7 cloud access **Scalability**
- Supports large number of players
- Expandable to multiple teams

3.3 Data Flow Diagram

Data Flow

User → Salesforce UI → Player Object → Match Performance → Reports → Dashboard



4. PROJECT DESIGN PHASE

4.1 Problem–Solution Fit

Manual record keeping caused errors and delays. CRICKSTATS solves this by:

- Automating calculations
- Centralizing data
- Providing live analytics
- Reducing manual work. **4.2**

Proposed Solution

The system includes:

- Custom Objects (Player, Match Performance)
- Master-Detail Relationship
- Roll-up Summary Fields
- Lightning App
- Screen Flow
- Reports & Dashboards

Key Features

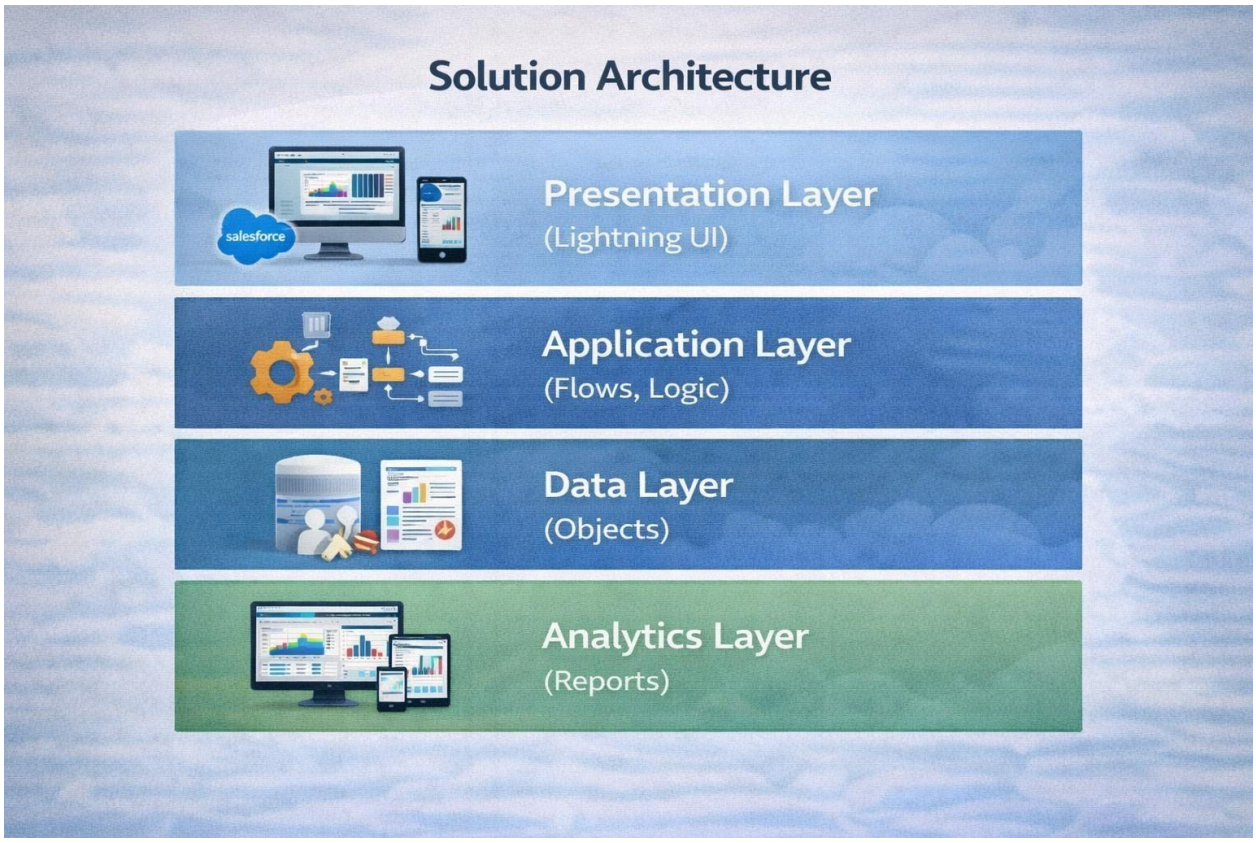
- Centralized database

- Live statistics
- Secure access
- Scalable design
- Easy reporting

4.3 Solution Architecture

Architecture Layers

- Presentation Layer -Lightning UI
- Application Layer -Flows, Logic
- Data Layer -Objects
- Analytics Layer -Reports



5. PROJECT PLANNING & SCHEDULING

5.1 Project Planning

- Agile-based execution

Sprint	Functional Requirement (Epic)	User Story Number	User Story / Task	Story Points	Priority	Team Members
Sprint-1	Developer Setup	USN-1	Create Salesforce Development account	1	High	K.Deepika
Sprint-1	Data Modeling	USN-2	Create Player & Match Performance objects	3	High	A.Jaithunbee
Sprint-2	Fields Creation	USN-3	Create basic custom fields	3	High	S.Javidha Begum
Sprint-2	Navigation	USN-4	Create Tabs & Navigation items	3	High	N.Hema
Sprint-2	UI Design	USN-5	Create Lightning App	5	Medium	A.S.Jayasri
Sprint-2	Data Structure	USN-6	Create Page Layouts	5	High	K.Deepika
Sprint-2	Roll-up Summary & Automation	USN-7	Create roll-up summary fields Create Flow automation	3	High	A.Jaithunbee S.Javidha Begum

Sprint-3	Reporting & Testing	USN-8	Create Reports & Dashboards Perform functional & performance testing	5	High	A.Hema A.S.Jayasri

- Object creation → automation → reporting
- Sprint-wise development
- 5-member team collaboration

Product Backlog, Sprint Schedule

Project Tracker ,Velocity & Burndown Chart:

Sprint	Total Story Points	Duration	Sprint Start Date	Sprint End Date (Planned)	Story Points Completed (as on Planned End Date)	Sprint Release Date (Actual)
Sprint-1	20	2 Days	26 Feb 2026	27 Feb 2026	20	27 Feb 2026
Sprint-2	20	2 Days	28 Feb 2026	01 Mar 2026	20	01 Mar 2026
Sprint-3	20	2 Days	02 Mar 2026	03 Mar 2026	20	03 Mar 2026
Sprint-4	20	2 Days	04 Mar 2026	05 Mar 2026	20	05 Mar 2026

Team Members & Roles

- Member 1 – Developer Account & Page Layout
- Member 2 – Object Creation & Roll-up Summary
- Member 3 – Fields & Flow Automation
- Member 4 – Tabs, Reports & Dashboard
- Member 5 – Lightning App & Testing

6. Project Development Phase:

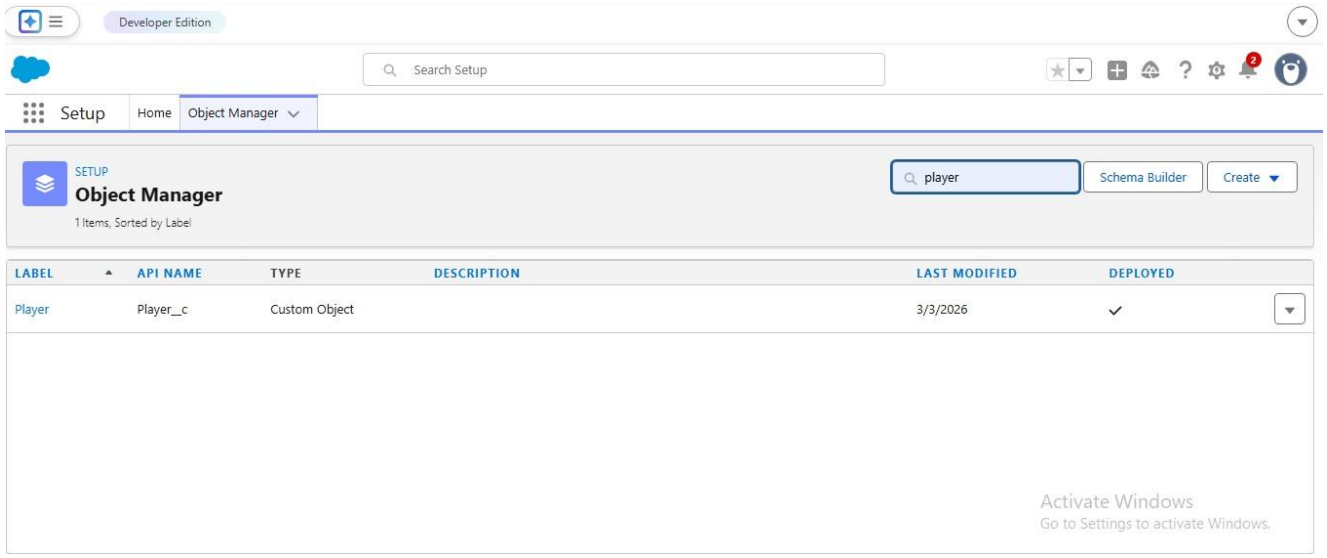
Milestone 1 - Salesforce developer account creation :

Developer account was created in Salesforce and activated successfully

Milestone 2 - Object Creation

Activity 1 : Player Object

- Stores player details like:
- Player Name
- Player Number
- Date of Birth ● Role
- Batting Style
- Bowling Style
- Nationality
- Team



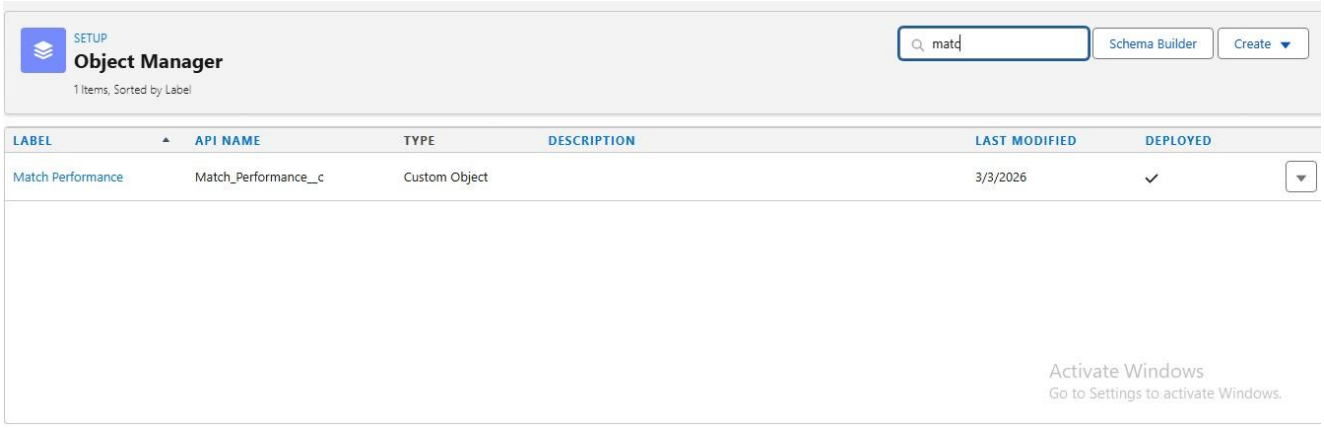
Activity 2 : Match Performance Object

Stores match data: ●

Runs Scored

- Balls Faced
- Fours & Sixes
- Overs Bowled
- Wickets Taken

- Catches
-
- Stumpings
- Match Result

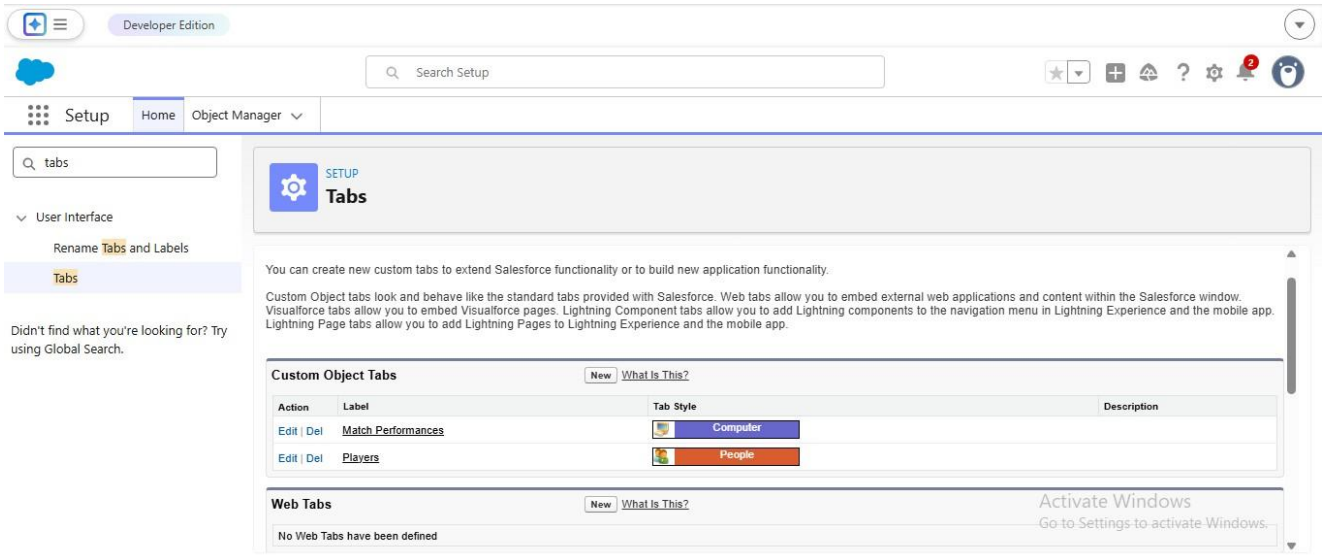


Milestone 3 - Tabs

Custom tabs creation

Custom tabs were created for:

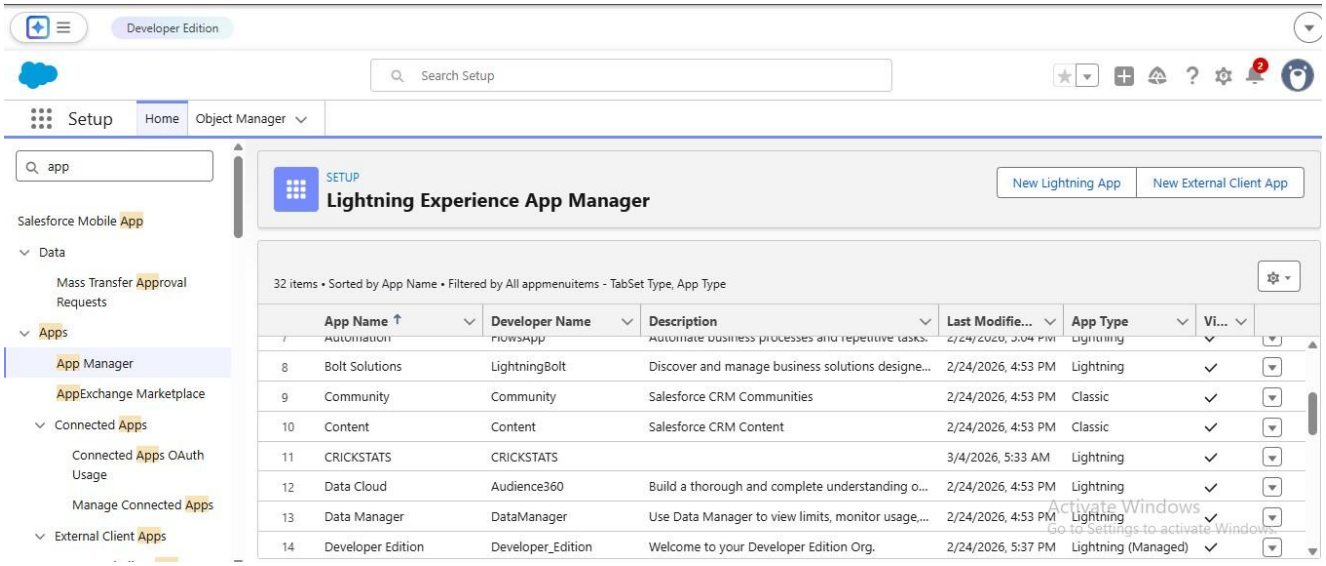
- Players
- Match Performances



Milestone 4 - The Lightning App

A Lightning App named CRICKSTATS was created including:

- Player Object
- Match Performance Object
- Reports
- Dashboards



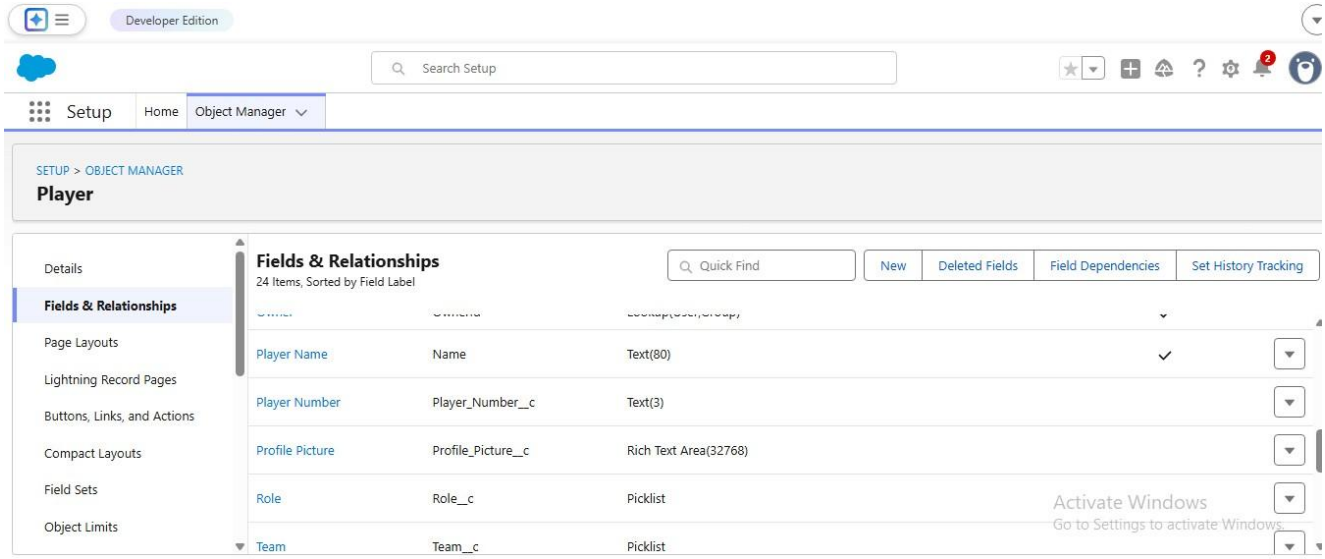
Milestone 5:Create Custom fields for Player object

The following custom fields were created in the Player Object to store player information.

Fields created in Player Object:

- Player Name (Text)
- Player Number (Text)
- Profile Picture (Rich Text Area)
- Date of Birth (Date)
- Role (Picklist)
- Batting Style (Picklist)
- Bowling Style (Picklist)
- Nationality (Picklist)
- Team (Picklist)
- AVG Score (Formula)

These fields help to store complete details of each cricket player.

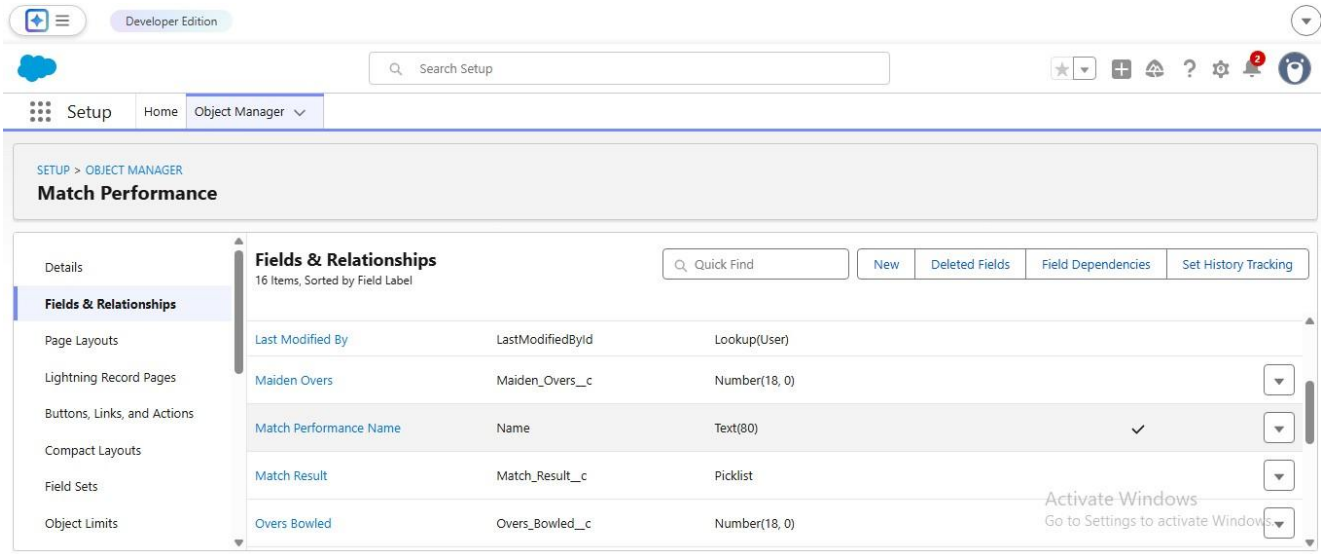


Activity 2 : Create Custom fields for Match Performance object.

The Match Performance Object stores match statistics of players.

Fields created in Match Performance Object:

- Match Performance Name (Text)
- Player of the Match (Checkbox)
- Match Result (Picklist)
- Runs Scored (Number)
- Balls Faced (Number)
- Fours (Number)
- Sixes (Number)
- Overs Bowled (Number)
- Wickets Taken (Number)
- Runs Conceded (Number)
- Maiden Overs (Number)
- Stumpings (Number)
- Catches (Number)



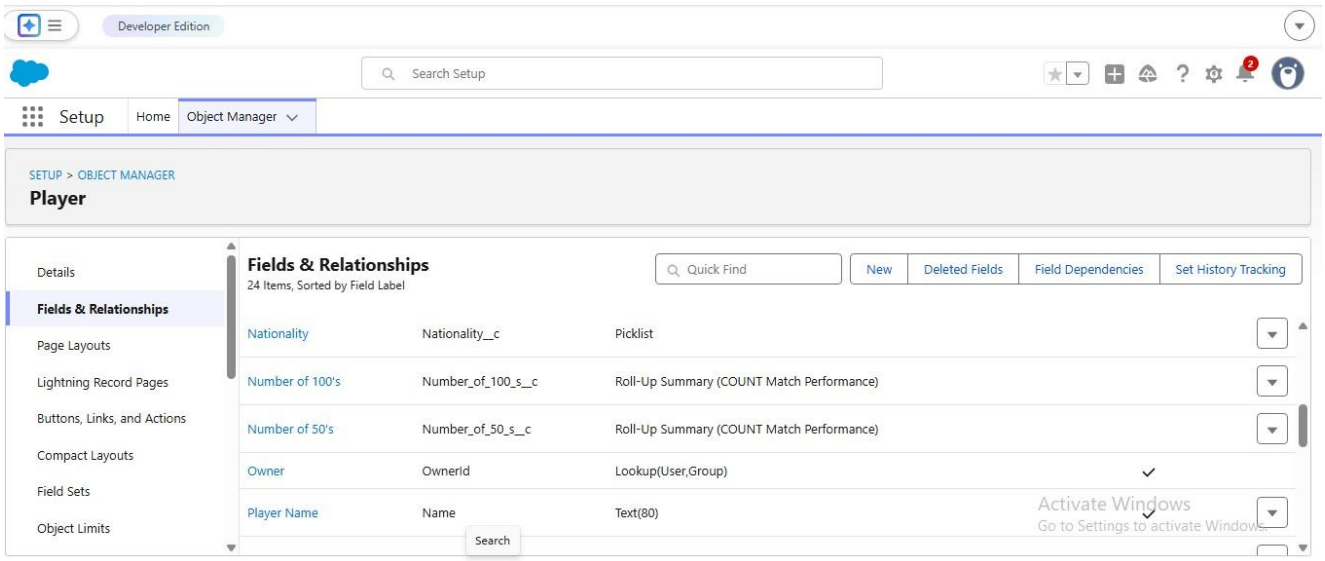
<u>Milestone 6 : Roll-up Summary</u>

Activity 1 : Create Roll-up Summary for Player object.

Roll-up Summary Fields Created

The following roll-up summary fields were implemented:

- Matches Played – Counts the number of match performance records.
- Total Runs – Calculates the total runs scored by the player.
- Total 4's – Calculates the total number of fours scored.
- Total 6's – Calculates the total number of sixes scored.
- Total Overs – Calculates the total overs bowled.
- Total Wickets – Calculates the total wickets taken.
- Total Stumpings – Calculates the total stumpings.
- Total Catches – Calculates the total catches taken.



Milestone 7 : Flows

Activity 1 : Screen Flow

- Select Team
- Display players
- Show performance details in data table

Flow added to Home Page of CRICKSTATS App.

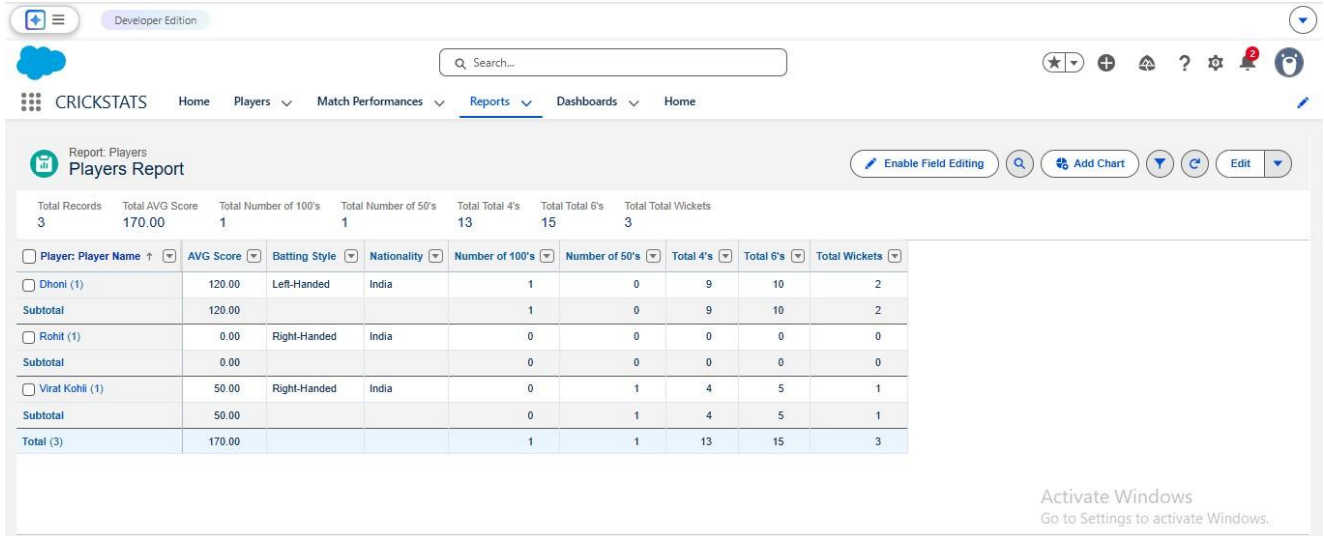
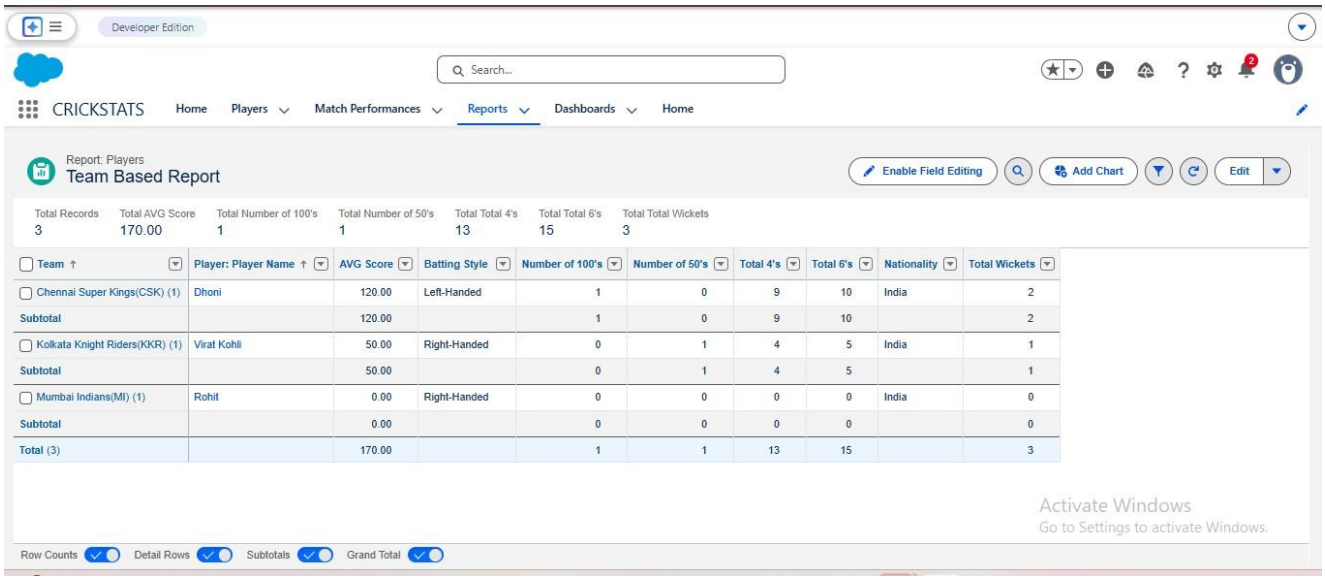
FUNCTIONAL & PERFORMANCE TESTING

- Select Team
- Display players
- Show performance details in data table

Flow added to Home Page of CRICKSTATS App.



Player: Player Name	AVG Score	Batting Style	Nationality	Number of 100's	Number of 50's	Total 4's	Total 6's	Total Wickets
Dhoni (1)	120.00	Left-Handed	India	1	0	9	10	2
Subtotal	120.00			1	0	9	10	2
Rohit (1)	0.00	Right-Handed	India	0	0	0	0	0
Subtotal	0.00			0	0	0	0	0
Virat Kohli (1)	50.00	Right-Handed	India	0	1	4	5	1
Subtotal	50.00			0	1	4	5	1
Total (3)	170.00			1	1	13	15	3



Team	Player: Player Name	AVG Score	Batting Style	Number of 100's	Number of 50's	Total 4's	Total 6's	Nationality	Total Wickets
Chennai Super Kings(CSK) (1)	Dhoni	120.00	Left-Handed	1	0	9	10	India	2
Subtotal		120.00		1	0	9	10		2
Kolkata Knight Riders(KKR) (1)	Virat Kohli	50.00	Right-Handed	0	1	4	5	India	1
Subtotal		50.00		0	1	4	5		1
Mumbai Indians(MI) (1)	Rohit	0.00	Right-Handed	0	0	0	0	India	0
Subtotal		0.00		0	0	0	0		0
Total (3)		170.00		1	1	13	15		3

8. ADVANTAGES & DISADVANTAGES

Advantages

- Centralized system
- Real-time analytics
- Secure platform
- Scalable design
- Reduced manual work

Disadvantages

- Requires Salesforce license
- Internet dependency
- Limited offline access

9. Conclusion:

CRICKSTATS successfully implements a cloud-based cricket performance tracking system using Salesforce. The system automates data management, improves reporting accuracy, and supports informed decision-making.

The project demonstrates practical application of SDLC, Agile methodology, and CRMbased development.

10. FUTURE SCOPE

- Mobile application integration
- AI-based performance prediction
- Video analysis integration
- Player ranking system
- Public statistics portal
- Multi-league support

11. APPENDIX

- Salesforce Objects & Fields
- Manual match statistics ● Flow Configurations
